Equity means opportunities and results

The success of our partners makes clear—equity is more than a goal or a mindset; it is a pathway to opportunities and results.

Dear Friends:

The pandemic is heightening attention on persistent inequities and achievement gaps in schools. In this context, district leaders are facing complex decisions around student and teacher health, modes of learning, and curriculum content.

We help our partners turn their commitments into actions which advance equity of learning opportunities *and* student results. Districts can meet the immediate needs of their community while working toward equitable outcomes for students.

Through our [Center for Equity Leadership](#), key CTAC services assist our partners to:

- Assess the state of the organization through a Diversity, Equity, and Inclusion Scan
- Redesign schools for equity
- Accelerate learning and equity through STEM
- Enhance principals' instructional leadership and equity effectiveness
- Organize and communicate with a student focus
- Lead districts during a period of unprecedented uncertainty

[Learn more](#) about the Center for Equity Leadership and our equity services for schools, districts, and community organizations.

Best Regards,
William J. Slotnik
Founder and Chief Executive Officer
Community Training and Assistance Center (CTAC)
