Subject: Portable Weapon Detection

WARNING: EXTERNAL EMAIL - THIS EMAIL DID NOT ORIGINATE FROM WCS

Hi Jason,

Have you noticed the drastic uptick in 2021 of incidents with weapons on campus?

We at Ballistiglass have a solution to implement weapons detection while maintaining a welcoming atmosphere on campus.

The best part! It's totally portable and can be broken down and set up in 5 minutes.

BallistiSCAN is a stealth metal detection kit. The entire system is the **size of two hockey pucks** that get placed atop two stanchions and comes with a laptop computer.

It's a plug & play and comes to you in a hard carry case, with everything included. Best of all, the entire system **weighs 11 pounds** and sets up in **under 5 minutes**. It's military grade sensors keep weapons where they belong... Outside your building, sporting event dance or other gathering.

[See it here.](#)

BallistiSCAN includes a **30 day no questions asked return policy** and a one year warranty; which states if any of our products fail, a **replacement will be shipped to you overnight**. Unlike with most companies, there is **NEVER** a restocking fee at BALLISTIGLASS.

Districts all around the country have installed our safety solution. If you'd like to know more, please feel free to call Steve at [REDACTED] or Lisa at [REDACTED] to have your questions answered.

All our best,

Steve & Lisa
